

The Setting

The Wimpfheimer Nursery School is a laboratory school located on the beautiful Vassar College campus. The school has two play yards, and uses the campus for walks, picnics, sports and exploration.

The Program

The summer program takes place outdoors in a relaxed and spacious setting. Children explore this natural environment under the guidance of experienced teachers and college students. Our hands-on early childhood curriculum features different themes each week. Children participate in a variety of activities, including art, drama, games, gardening, cooking, storytelling, music, water play, science, & nature walks.

A morning snack is provided. Children in the full day program bring their own lunch and receive an additional afternoon snack.

Ages

The program is for children ages 2 years 6 months through kindergarten. Children under age four who are new to the school are eligible to enroll in the full day program in consultation with the Summer Program Director.

Registration is on a first come, first served basis and will be confirmed upon the receipt of the registration form and a non-refundable \$50 deposit. A contract and medical form will be sent upon receipt of a deposit.

Please note that the Summer Program tuition rates are for registration with paid deposit through April 1. **Registration after April 1 will incur a 5% tuition surcharge.**

Summer Program Registration will close on April 30.
